

P-METHRINE 10 EC

Concentrated Emulsifiable Insecticide
to fight against flying and crawling insects
Contains 100 g / L Permethrin (EC)

Product presentation

P-METHRINE 10 EC is an Emulsifiable Concentrated Insecticide intended to be diluted in water for the residual treatment of surfaces inside buildings against crawling insects (cockroaches, fleas, bugs ...) in the following places: dwellings, common parts of buildings, ducts, basements, industrial warehouses.

P-METHRINE 10 EC has a good flushing effect followed by rapid mortality.

P-METHRINE 10 EC contains permethrin, a photostable pyrethroid that acts mainly by contact but also by ingestion.

Mode and doses of employment

P-METHRINE 10 EC is intended to be diluted in water, but may optionally be diluted in a petroleum solvent.

P-METHRINE 10 EC is used for surface spraying and is used in general with any wetting spray device.

Doses of P-METHRINE 10 EC:
